Los Angeles Vascular Center offers all the great vascular access salvage work of a hospital at a fraction of the cost. Our facility is state-of-the-art and our team is dedicated to excellence in patient care. Our services include:

- One-call coordination between vascular access centers and nephrology practices/dialysis facilities.
- Timely service to minimize missed dialysis treatments.
- Interventionalist who is experienced, highly-trained and directed toward better patient outcomes.
- Information sharing to ensure that referring physicians receive timely results on vascular access procedures performed on their patients.
- Highly satisfied patients who express a preference for an outpatient setting and the timely service of a dedicated dialysis access center.

In order to ensure continuity of care, Los Angeles Vascular Center's physicians will always inform the patient's nephrologist concerning problems before and after any procedure performed here. Los Angeles Vascular Center will follow the instructions of that nephrologist and the patient will be sent to the hospital chosen by the nephrologist. Los Angeles Vascular Center primarily focuses on the following procedures:

- Angiograms
- Angioplasty
- Thrombectomy
- Catheter placements, removals and exchanges
- Comprehensive peritoneal catheter care
- Vein mapping
- Renal artery angiograms

Los Angeles Vascular Center is pleased to announce that it will offer relief to patients with chronic pain by using spinal cord stimulation. Spinal cord stimulation (SCS) eliminates pain by masking pain signals transmitted by nerves by delivering painless electrical impulses to the spinal cord. The net result of this electrical stimulation is that the masked signals travel to the brain giving the patient a smooth tingling sensation, called paraesthesia, and this results in a significant reduction of the patient's pain.

The Los Angeles Vascular Center is pleased to be among the first facilities in the greater Los Angeles Area to offer CO2 angiograms of the legs – these studies have NO DYE, NO RENAL FAILURE and NO PAIN! We also offer the following advanced procedures:

Femoral arterial angioplasty
PICC line insertion
